PROJECTS

MediSafe - Intelligent Medical Companion

Tech Stack: Dart (Flutter), Firebase, Groq (LLM)
- Developed a smart medical management app with AI-powered medicine insights using Groq LLM.
- Implemented medication scheduling, intelligent reminders, and visual intake tracking.
- Built medical cabinet management with inventory tracking, expiry alerts, and refill notifications.
- Integrated drug interaction warnings, side effect analysis, and personalized health recommendations.
- Enabled prescription upload, medication history tracking, and health notes management.
- Ensured secure local data storage, backup/restore functionality, and privacy-focused design.
- Designed a modern, accessible UI with dark theme, intuitive navigation, and responsive layout.
